```java
//Greatest Common Divisor

	int gcd (int x, int y){
		if (y==0) {

			return x;
		}

		if (x>=y && x !=0)  {

			return gcd(y,x%y);
		}

		System.out.println("could not create");
		return 0;
	}
```

Big O

O (GCD) = 1 (n) 1 (log(n)) 1

= n + 1 (log(n) 1

= n+(log(n)1

Linear logarithmic

```
int Ack(int x, int y) {

                if (x == 0) {
                 return 2 * y;
                } else if (x >= 1) {
                 if (y == 0) {
                  return 0;
                 } else if (y == 0) {
                  return 2;
                 } else {
                  return Ack(x - 1,     Ack(x, y - 1));
                 }
                }
                return y;
               }
```
